

CHEMICAL MIXING TANK

THE ULTIMATE SOLUTION FOR SAFE AND EFFICIENT CHEMICAL MIXING

The BA Chemical Mixing Tank is engineered by BA Pumps & Sprayers to address the challenges often encountered with chemical handling. Whether you're working with liquids or powders, including difficult substances like sulphur, this robust and reliable tank ensures thorough and consistent mixing every time.

KEY FEATURES:

- ✓ **Ground-Level Operation:** No more lifting heavy bags or drums. The BA Chemical Mixing Tank is designed for ground-height chemical mixing, making the process safer and more convenient.
- ✓ **Powerful Mixing Capability:** With the BA Chemical Mixing Tank, you can efficiently mix both liquid and powder-based chemicals. The system guarantees a thorough blend, ensuring the highest quality mix for your needs.
- ✓ **High-Efficiency Pump:** Equipped with a single-phase centrifugal pump, the BA Chemical Mixing Tank delivers rapid mixing and transferring capabilities, moving up to 200 litres per minute (lpm) of mixed product directly into your spray tank.
- ✓ **Capacity:** Capable of mixing up to 65 litres, the BA Mixing Tank is designed to handle your chemical mixing tasks with ease and efficiency.
- ✓ **User-Friendly Control Taps:**
 - **Fresh Water to Mixer:** Easily add fresh water to the mixer for dilution or cleaning
 - **Mixing:** Activate the mixer to start the chemical blending process
 - **Mixed Product to Spray Tank:** Quickly transfer the fully mixed solution into your spray tank
 - **Fresh Water to Spray Tank:** Connect fresh water from your main supply directly to the spray tank
 - **Wash Function for Mixing Bowl:** Clean the mixing bowl efficiently after each use.

MIX IT UP WITH BA

The BA Chemical Mixing Tank simplifies the chemical mixing process, enhances safety, and boosts productivity.
